Abstract (en)
[origin: WO2018059830A1] The invention relates to a filter element for filtering air in a motor vehicle and/or operating media of a motor vehicle, which filter element comprises a bellows (1), which has folds and is folded in a zig-zag shape and has a first section (2) having a first curvature (4) and a second section (3) having a second curvature (5). The first curvature (4) is greater than the second curvature (5), and the folds of the first section (2) have a varying fold height (H1, H2).
