Abstract (en)
[origin: WO2018065205A1] The invention proposes a capsule (1) for preparing a beverage from at least one starting substance, and also a method for producing a capsule. The capsule (1) comprises a preferably rotationally symmetrical capsule body (2) for accommodating the at least one starting substance, and also a cover (3), which covers the capsule body (2). The capsule body (2) is designed in at least in two parts and comprises at least one trough part (4) and at least one connection part (5), in order for liquid to be channelled out of the capsule (1) by a beverage-making apparatus provided for this purpose. The connection part (5) is arranged between the trough part (4) and the cover (3). The trough part (4) is connected in a fluid-tight manner to the connection part (5), and the connection part (5) is connected in a fluid-tight manner to the cover (3).
