Abstract (en)

[origin: WO2018146141A1] The present invention relates to a device (1), in particular an outlet device, intended for cleaning for example a single- or multi-bladed wet razor head and comprising a housing (2) which can be mounted on the water outlet of a sanitary outlet fitting via a water through-flow opening (20). At least one water-carrying duct (22) of at least one mechanism (21) that is arranged inside the housing (2) of the device (1) and that is designed to produce a pulsating water jet and/or to increase the flow speed of the mains water exiting the outlet of the tap adjoins said water through-flow opening (20), said mechanism (21) receiving the mains water via the duct (22) and transferring the line pressure to a water outlet (23). The device according to the invention is characterized by comprising at least one water outlet (25) connected to at least one further duct (24).
