Abstract (en)

[origin: WO2018058166A1] The invention relates to a connecting device (1, 20, 30, 40, 50, 60) for connecting thin-walled finished parts (11) made from a pourable and curable material (12). The connecting device (1, 20, 30, 40, 50, 60) has at least one connecting element (3), an edge protection element (2), which lies at least partly along an end face (13) of the finished part (11), the at least one connecting element (3) extending from the edge protection element (2), and at least one anchor element (4), which extends from the edge protection element (2). The edge protection element (2), the anchor element (4), and the connecting element (3) are formed as a single piece.
