Abstract (en)
[origin: WO2018060560A1] The invention relates to a system for controlling the opening of a vehicle (1) door (3) from the exterior, characterised in that it comprises: a handle (5) that can be actuated mechanically in an open position, in which the handle can be used to open the door; a bucket (6) to be secured in the door, comprising a housing designed to receive the handle; and a set of water drainage holes, including at least one hole (OP,1) that extends through the handle and one hole that extends through the bucket.
