Abstract (en)  
The invention relates to a card protection box, which comprises a box body, one end of the box body is provided with a card passage, one side of the other end of the box body is provided with a transverse mortise, the transverse mortise is provided with a pushing handle capable of moving along the transverse mortise, and the pushing handle partially extends inside the box body through the transverse mortise and is provided with a tooth portion; and an inner end inside the box body is provided with a supporting plate, the supporting plate is rotatably connected to a card shifter, the card shifter has a tooth meshed with the tooth portion, when the pushing handle is pushed to move along the transverse mortise, the pushing handle can push the card shifter to rotate, and the rotation of the card shifter can push out a card inside the box body from the card passage. The invention is relatively convenient to be put into or taken out from a trouser pocket without needing to push the card shifter with a great force, is relatively convenient to take out and put in the card, is simple to operate, and has strong practicability.
