Abstract (en)
The present invention relates to a user interface (10) for a domestic appliance, in particular for a cooking hob and/or cooking oven. The user interface (10) comprises a printed circuit board (12) for supporting at least one illuminating element. The user interface (10) comprises a lighting mask (14) arranged at least partially within a radiation area of the illuminating element on the printed circuit board (12). The lighting mask (14) includes at least one spring element (18). The spring element (18) of the lighting mask (14) penetrates and/or passes by the printed circuit board (12), so that the user interface (10) can be supported between a substructure and a cover element of the domestic appliance.
