Abstract (en)

[origin: WO2018065211A1] The present invention relates to a fluid filter for a fluid device with a pump element and/or a solenoid valve in a motor vehicle, in particular for an ESP system, wherein the fluid filter is directly injected, wherein the fluid filter has at least one filter connecting piece. According to the invention, the fluid filter is characterised in that the filter connecting piece has an outer section, a middle section and an inner section, wherein the outer section is in the form of a projection that is directed outwards with respect to the fluid filter, and the inner section is in the form of a projection that is directed inwards with respect to the fluid filter.
