Abstract (en)

[origin: WO2018078096A1] The invention relates to a laboratory device, in particular a magnetic stirrer, having an outer surface portion, in particular a placement surface for a vessel, wherein the laboratory device comprises a display device which is designed to display a respective temperature state of the outer surface portion, and wherein the laboratory device is designed to also use at least heat of the outer surface portion for supplying energy to the display device.
