Abstract (en)

[origin: WO2018108563A1] The invention relates to a coating device for coating components with a coating agent, in particular for painting motor vehicle bodywork components. The coating device comprises a nozzle applicator (1), in particular a print head, which has at least one nozzle for discharging a coating agent jet (13-19) of the coating agent onto the component to be coated. The invention provides a device for preventing and/or detecting a clogging of the nozzle.
