Abstract (en)
[origin: WO2018065722A1] The present invention concerns a carriage (5), for moving bottle products (2) from one station (3) to another of a processing line (1) for processing said products (2), said carriage (5) being movable on a floor and comprising a self-contained drive means configured to allow it to move from one predefined station (3) to another predefined station (3). Said carriage (5) comprises a plate (17), provided with a receiving surface (8) suitable for receiving a plurality of products (2), and a shuttle (18), provided with said self-contained drive means and a means for engaging with/disengaging from said plate (17). The present invention also concerns a corresponding processing line and method.
