Abstract (en)
[origin: WO2018066006A1] The present invention relates to bleaching compositions suitable for use in hard surface cleaning and laundry applications comprising a hypohalite bleach, a source of alkalinity in an amount of 0.05% to 10% by weight of the total composition, and an effective amount of an hybrid polymer comprising a synthetic polymer as the backbone of the hybrid polymer, and a chain transfer agent selected from the group consisting of gluconic acid, glucoheptonic acid and naturally derived mono-, di-, oligo- or polysaccharides, as the chain terminating portion of the polymer. It further relates to uses of the bleaching composition for providing improved safety to the fabrics treated therewith or improved shine to the hard surface treated therewith.
