Abstract (en)

[origin: WO2018069806A1] The apparatus for finishing men's socks and the like comprises a framework (2) shaping a flatbed (3) extended along a substantially horizontal plane, on which a closed path is defined, substantially polygonal or elliptic, along which sides a series of working stations are arranged. Along said closed path there are a plurality of transport devices (5), mobile at pitch, predisposed to move a respective form (4) predisposed to carry at least a respective form (4) on which the textile articles to board with steam are inserted in use. The working stations of the apparatus comprise a steam boarding station (10) comprising a first boarding chamber (11) and a second boarding chamber (12) arranged in line along said closed path along the feeding direction of said transport devices (5).
