Abstract (en)

[origin: WO2018065147A1] The invention relates to an internal combustion engine (2), having an engine block (24) and a cylinder head (23), wherein at least one crankcase (3) and at least one cylinder (4) are arranged in the internal combustion engine (2), said at least one cylinder being connected to at least one intake line (5), wherein the crankcase (3) is connected to the at least one intake line (5) via a crankcase ventilation line (11), and wherein the crankcase ventilation line (11) is arranged at least predominantly within the internal combustion engine (2), in particular within the engine block (24) and/or within the cylinder head (23).
