Abstract (en)  
[origin: WO2018068984A1] The present invention relates to a device for ejecting (10) cartridges (5) and/or links (2) from a chain or ammunition (1) strip (3) connected to a main (19) and/or secondary (33) weapon in a turret (9) assembled on an armoured vehicle, the ejection device (10) comprising a plurality of structural elements defined geometrically and mechanically, enabling, after shooting ammunition (1), guiding of the movement of the cartridges (5) and/or the links (2) from the inside to the outside of said turret (9), along a predetermined path, and comprising means for vibrating at least one part of these structural elements to encourage said movement of cartridges (5) and/or links (2).
