Abstract (en)

[origin: WO2018065133A1] The invention relates to a system for converting a mobile electronic payment terminal (20) into a fixed electronic payment terminal (20), comprising the following elements: • two support elements (10) comprising first attachment means (101) and first reversible locking means (102), the support elements being configured to receive the terminal (20) or a charging base (30) for charging the terminal (20) and to be secured to the charging base (30) or a fixed stand (40); • a lower trap (11) intended to be fixed under the terminal (20) and comprising second attachment means (111) configured to cooperate with the first attachment means (101) of a support element (10), and second reversible locking means (112) configured to cooperate with the first reversible locking means (102) of a support element (10).
