Abstract (en)
[origin: WO2019155079A1] The invention relates to a device (1) for hair supplementation having first hairs (2), which are anchored by the top ends (6) thereof in a first plastic matrix (9), a carrier strip (4) to the front side of which the first plastic matrix (9) is fixed, which extends along the hairs (2) over the full width of the carrier strip (4) and is covered on the outside thereof by a first matte cover layer, and a plastic layer (11) on the rear side of the carrier strip (4) for fixing a carrier of the device (1) to natural hairs (14) , furthermore having two hairs (3), which are anchored by the top ends (7) thereof in a second plastic matrix (10), which is arranged on the top edge (8) of the carrier strip (4) on the first matte cover layer and extends along the hairs (3) over half the width of the carrier strip (4) at maximum, wherein the second hairs (3) extend freely under the second plastic matrix (10) over the first matte cover layer.
