Abstract (en)

[origin: EP3524817A1] A scroll fluid machine (10) has a first scroll (20) and a second scroll (30) that are movable relative to each other and are opposed to each other, and an annular dustproof seal member (50) disposed between and in contact with the first and second scrolls. The annular dustproof seal member (50) has a cut defined by two portions (51, 52) that overlap each other in a width direction rd. The two portions (51, 52) are movable relative to each other while they overlap each other in the width direction.
