Abstract (en)
[origin: CA3039921A1] The invention relates to a injection nozzle for a needleless injection device, comprising a outflow channel (42) extending along an injection axis (B), the at least one outflow channel (42) comprising: a first channel portion of a first section; a second channel portion of a second section, the first section being higher than the second section; and a connection portion between the first channel portion and the second channel portion, the connection portion being inclined by an angle of between 70° and 90° in relation to the injection axis (B).
