Abstract (en)

[origin: WO2018069605A1] Bike support (2) for mounting on a vehicle (1), said bike support comprising: - two slide supports (5) for mounting on the hitch bracket of the vehicle; - two slides (13) designed to be mounted such that they can slide along a respective first axis in the two slide supports, said two slides being slidable between an initial position and a deployed position; - at least one frame support (26) for supporting a bike frame, the frame support being mounted with one of the two slides between two positions: a first position in which the frame support extends along a second axis, substantially coplanar with the first axis, and a second position.
