Abstract (en)

[origin: WO2018069628A1] The invention relates mainly to a method for producing a brush holder, characterised in that it comprises: a step of creating a trace (11) from a metal strip, comprising a plurality of electric circuits (12) that are interconnected by a connecting portion (14); a step of separating the connecting portion (14) from the electric circuits (12) in order to from a heat sink (20) and to separate the electric circuits (12) from each other; and a step of moulding a plastic housing over the electric circuits (12) and the heat sink (20).
