Abstract (en)
[origin: EP3527750A1] A modellable flat grate, comprising: a support (2), comprising a plurality of longitudinal elements (21) and transverse elements (22) connected to each other to define a lying plane (A); a plurality of slats (31), connected to the longitudinal elements (21) on the lying plane (A) and separated from each other by slits (32). The transverse elements (22) can be split up at the slits (32) to allow the mutual rotation of two or more longitudinal elements (21) only on the lying plane (A).
