Abstract (en)
[origin: US2019257299A1] A pump for a two wheeler tire comprises: a cylinder-piston unit for generating compressed air that can be used to inflate a two wheeler tire; a pump head that comprises a connecting mechanism for connecting to a valve of the two wheeler tire; a tube that connects the pump head to the cylinder-piston unit; a pedal mechanism that enables an actuation of the cylinder-piston unit; a receiving element in which the tube can be disposed in a storage position; and a manometer around which the tube extends in the storage position. The tube connecting the pump head to the cylinder-piston unit is designed so as to be spiral shaped.
