Abstract (en)
[origin: EP3527871A1] The present invention relates to a kit 20 for making a reconfigurable lamp 22. The kit comprises:- a base plate 24 having prevailing extension in a plane π and comprising a plurality of through holes 26 having axis perpendicular to the plane π ;- a plurality of support rods 28, each of which has:- prevailing extension along an own axis X,- at least one threaded hole 30 having axis parallel to the axis X,- at least one through hole 27 having axis perpendicular to the axis X,- at least one light emitting body 32 suitable for generating a light cone having axis L, and comprising a threaded hole 31 having axis perpendicular to axis L,- a first screw 34, suitable for crossing one of the through holes 26 of the base plate and for engaging the threaded hole 30 of a support rod 28, so as to secure said support rod 28 to the base plate 24; and- a second screw 35 suitable for crossing one of the through holes 27 of a support rod 28 and for engaging the threaded hole 31 of the light emitting body 32, so as to secure the light emitting body 32 to said support rod 28.
