Abstract (en)

Method for transmitting wireless audio streams in an audio system comprising a first transmitter unit. The method comprising: transmitting a first audio block in a first audio frame, the first audio block comprising a first primary audio package comprising transmitter unit address of the first transmitter unit; transmitting a first primary pilot package, the first primary pilot package comprising transmitter unit address of the first transmitter unit, a first primary time offset, and channel identifier of a first primary audio package of a second audio block in a second audio frame; and transmitting a first primary audio package of the second audio block at a start time depending on the first primary time offset and the channel identifier.
