Abstract (en)  
[origin: WO2018078229A1] The present invention concerns a sorting table (10) with an adjustable screen for fruit, comprising a series of conveyor/sorter rollers (12) arranged in a sorting plane and parallel to each other, the conveyor/sorter rollers each having at least one sorter section (30), a spacing (36) being provided respectively between opposing sorter sections (30) of successive conveyor/sorter rollers (12) in order to allow fruit to pass selectively through the table, via said spacing. According to the invention, the sorting table comprises conveyor/sorter rollers provided with sorter sections (30) that have an adjustable diameter and a control device (76) for controlling the diameter of the adjustable-diameter sorter sections. Application to sorting a fruit or grape crop.
