Abstract (en)

[origin: WO2018072156A1] An internal component design (10) has a battery (12) having a battery axis, a motor (14) electrically-connected to the battery (12), a pump (16) operatively-connected to the motor (14) and an output valve (32) fluidly-connected to the pump (16). The motor (14) has a motor axis and the pump (16) has a pump axis. The battery (12) is immediately adjacent to the motor (14), and the motor axis is parallel to the battery axis. Furthermore, the pump axis is parallel to the motor axis and the output valve (32) is below the pump (16). An electric power washer having such an internal component design (10) is also provided.
