Abstract (en)

[origin: WO2018074962A1] A framing section (100) for integration into a wall includes first and second wall members (110, 120) arranged opposite to one another and with respective main surfaces oriented in parallel. A block unit (150), arranged between the first and second wall members (110, 120), has partitions (150A, 150B) arranged with respective main surfaces oriented perpendicularly to the first and second wall members (110, 120) and connected thereto via tongues (151A, 152A; 151B, 152B) inserted into grooves (110A, 110B; 120A, 120B) of the first and second wall members (110, 120). The first and second wall members (110; 120) are secured to the block unit (150) via locking members (151R, 152R; 351, 352) engaging into the grooves (110A, 110B; 120A, 120B) of the first and second wall members (110; 120) respectively.
