Abstract (en)
[origin: WO2018071925A1] The invention relates to a method for configuring an Internet service provider (3), wherein: a) the Internet service provider (3) is assigned an identification server (31); b) a request (R) is transmitted from the user (1) to a server (21); c) a response (S) containing a program logic (L) and a program sequence (P) is transmitted to the user (1); d) the terminal (11) allows the program sequence (P) to be initiated according to the program logic (L); e) the program sequence (P) is executed after initiation in step d), the program sequence (P) prompting the terminal (11) to transmit a configuration message (K) to the configuration server (31); f) after this configuration message (K) has arrived, the configuration server (31) determines the identity (ID) assigned to the user (1); and g) a configuration database (32) of the Internet service provider (3) is modified on the basis of the determined identity (ID) such that the Internet service provider (3) processes data relating to the user (1) according to different criteria from then on.
