Abstract (en)

[origin: CA3092271A1] A station (1) for the localised surface treatment of an industrial component (2) to be treated, comprising a system (6) for applying a vacuum in the treatment chamber (5) and the feed and drain circuit (22, 23) making it possible to feed, or drain, the chamber, by virtue of treatment fluid being sucked through the feed and drain circuit (22, 23) from the storage vessels (3A, 3B, 3C, 3D,...) to the treatment chamber (5), when said vacuum is applied, or by virtue of the treatment fluid being returned to the storage vessels (3A, 3B, 3C, 3D,...) by force of gravity when the feed and drain circuit (22, 23) is set to atmospheric pressure.
