Abstract (en)

A device, adapted to be run on a tubing string 5 into a wellbore, comprises at least one inlet 22 for enabling the entry of a fluid into the tubing string, and a close mechanism 40 for closing the at least one inlet. In a configuration for immersing the tubing string in a fluid, the at least one inlet is open for letting that fluid enter the tubing string. Also disclosed is a method of running a tubing string to an intended depth in a wellbore having wellbore fluid inside.
