Abstract (en)  
The present invention refers to a household apparatus, in particular to a free standing gas oven and, respectively, in a built-in gas oven comprising a body with a cooking surface and an oven, at least one gas burner being disposed on said cooking surface, said gas burner being fed by gas via a supply line comprising a main gas supply pipe with at least one gas blocking device, wherein said main gas supply pipe is fixed by means of at least one fixing means to the body of the household apparatus. A device for attaching main gas supply pipe comprises an opposite fixing means (14) permanently attached to a front plate (5) of a household apparatus, said fixing means (14) configured to cooperate with a fixing means (13) located at the opposite side and arranged on a main gas supply pipe (9).
