Abstract (en)  
An indoor unit according to the present invention has a flowing water path (5) that receives drainage water condensed in a main body of the indoor unit and discharges the drainage water, wherein a bottom surface (5a) of the flowing water path (5) is provided with a rib (11) for blocking a part of the flowing water path (5). The entire bottom surface (5a) is inclined to one side in a longitudinal direction, as well as to one side in a width direction perpendicular to the longitudinal direction. The rib (11) is provided in contact with a wall portion (5b) located at one side in the width direction. The rib (11) extends in a direction perpendicular to an extending direction in which the wall portion (5b) extends.
