Abstract (en)

[origin: WO2018077931A1] An item of furniture (1) comprises a furniture carcass (2) on which a drawer (3) and at least one inner drawer (5) are held in a movable manner, wherein the inner drawer (5), in a closed position, is at least partially concealed by a front panel (4) of the drawer (3), and the drawer (3) can be ejected via at least one first ejection device (12) after unlocking a locking device of the first ejection device (12) by movement of a driver (13) which is driven by a force accumulator, and the at least one inner drawer (5) can be ejected via at least one second ejection device (15) after unlocking a locking device of the second ejection device (15) by movement of a driver (16) which is driven by a force accumulator, wherein the locking device of the at least one first ejection device (12) is synchronized with the locking device of the at least one second ejection device (15) via mechanical synchronization means (21, 21'). The invention further relates to a method for opening a drawer (3) and an inner drawer (5).
