Abstract (en)  
[origin: WO2018078225A1] The present invention concerns a composition comprising at least one siRNA, said siRNA hybridising with a coding or non-coding mRNA, in which it induces degradation or inhibits translation, the expression of said mRNA or of the protein for which it codes being implicated in a pathology, for the use of same in the prevention and/or the treatment of said pathology, said composition being formulated for a continuous systemic administration mode, and a device comprising such an administration mode.
