Abstract (en)

[origin: WO2018077546A1] The invention relates to a composite pane for a motor vehicle, comprising a first pane and a second pane which are laminated with an intermediate plastic film. At least one depression (18), which extends in the direction of the first pane (12) and in which a light emitting diode is arranged, is introduced into the plastic film (16); a light emitting side of the light emitting diode faces the first pane.
