Abstract (en)

[origin: WO2018078581A1] A container for consumer goods that comprises a housing (12) comprising a box (14) and a lid (20) hingedly attached to the box. The box comprises a box front wall (16) and an interior box volume. The lid comprises a lid front wall (24). The container also comprises a sealed inner package (30) disposed at least partially within the interior box volume and defining an interior sealed volume for housing consumer goods. The container also comprises a resealable flap (44) configured to open and close the sealed inner package when the lid of the housing is opened and closed. The resealable flap (44) being positioned to cover an access opening (54) in the sealed inner package that extends at least partially across the top wall of the inner package. The container also comprises at least one release element (72) positioned within the interior sealed volume of the sealed inner package even after the sealed inner package has been opened and closed.
