Abstract (en)

[origin: EP3534098A1] The present invention relates to a raw material charging apparatus and a charging method thereof. The raw material charging apparatus includes a charging chute disposed between a raw material feeding part and a container to charge a raw material into the container, wherein the charging chute includes a movable roll, which is movable in a direction crossing a width direction of the charging chute, in at least a portion thereof. Thus, the raw material charging apparatus may quickly respond to an operation fluctuation to improve quality and productivity of sintered ore.
