Abstract (en)
[origin: WO2018082966A1] The invention relates to the technical field of combined casting-rolling installations. The aim of the invention is to provide a compact combined casting-rolling installation and a method for the continuous production of a hot-rolled finished strip (15) in the combined casting-rolling installation, whereby a high-quality finished strip (15) having different steel qualities can be produced at low cost. This aim is achieved by the combined casting-rolling installation according to claim 1 and a method for the continuous production of a hot-rolled finished strip (15) of steel according to claim 9.
