Abstract (en)

[origin: WO2018083571A1] Equipment (300) for the surface sanding of plate-shaped bodies (101), in particular of tiles, said equipment (300) comprising support and feeding means (100) for supporting said plate-shaped bodies (101) and feeding said plate-shaped bodies (101) along a given feed direction (D), so that during the movement along said given direction (D) the surface of each said plate-shaped body (101) that shall be sanded can be visible and accessed, said equipment (300) including a sanding module (200) provided with sanding means defining a sanding abrasive surface and with moving means for moving said abrasive surface in contact with the visible surface of said plate-shaped bodies (101) in succession during the movement thereof; wherein said sanding means comprise a closed belt (201) that defines said sanding abrasive surface and is suitable to be driven into rotation by means of said moving means.
