Abstract (en)
[origin: WO2018083413A1] The present invention relates to a device for handling products (2) between a workstation (1) and another station having a collecting surface (3), having at least two mobile tables (4) that are each provided with a receiving surface (5), said at least two mobile tables (4) being configured to be able to be disposed side by side, adjacent to said collecting surface (3), so as to be able to transfer products at the same time between the at least two tables (4) and the collecting surface (3). The present invention also relates to a method for handling products (2) between a workstation (1) and another station by means of a device according to the invention.
