Abstract (en)  
[origin: WO2018084781A1] The invention relates to a portable security container (10) for carrying goods, such as valuables, the portable security container comprising a manipulation system for manipulating the goods in response to an unexpected handling of the portable security container. The portable security container further comprises a motion sensor (16) configured to register movement of the portable security container and a control unit (17) configured to activate the manipulation system in response to a registered movement of the portable security container of a velocity (V) exceeding a threshold velocity (VTH).
