Abstract (en)

[origin: WO2018083309A2] The invention relates to a power circuit-breaker for high voltage networks, comprising a switching element (4) and a locking device, the locking device being designed to lock or release the switching element (4) in a deactivating position of the switching element (4), and the locking device (6) being designed to lock or release the switching element (4) in an activating position of the switching element (4).
