Abstract (en)

The dishwasher products dispenser kit comprises a container (2) of the products to be dispensed provided with a dispensing portion (6) and a closing member (9) of said dispensing portion (6) of the container (2). The closing member (9) is made of a water dispersible material for enabling the dispensing portion (6) to be opened during the washing step. The container (2) shapes at least one cavity (10) on the outer surface in longitudinal extension, adapted to couple with a corresponding prong of the dishwasher rack in order to allow the engagement of the same container (2) in the said rack. The kit includes a covering element (20, 200) applied at the cavity (10) to enable the stable engagement in the rack.
