Abstract (en)

The dishwasher products dispenser kit comprises a first container (2a) and a second container (2b) arranged in an adjacent configuration and predisposed to contain separately a respective product to be dispensed, and a covering element (3) wound at least partially around said first container (2a) and said second container (2b). At least one of the first container (2a) and the second container (2b) has at least one shaped portion (10), having a longitudinal extension, shaped so as to cooperate, in the adjacent configuration, with a corresponding portion facing the other said container (2a, 2b), in order to define an engagement channel (11) for a prong of a dishwasher rack.
