Abstract (en)
[origin: WO2018086731A1] The invention relates to a drying chamber comprising an air-conveying device which has at least one fan. The drying chamber also comprises a cooling device for the conveyed air. The air-conveying device is formed by individual air-conveying units (4), and the cooling device is formed by individual coolers (6). The air-conveying units (4) and the coolers (6) are combined to form autonomous air-conveyors/cooling units (7) respectively.
