Abstract (en)

[origin: WO2018086785A1] The invention relates to a device (100, 200, 300, 400) for detecting a number of electrostatic discharges with a discharge protection device (103, 203, 303, 403), characterized in that a detection unit (107, 207, 307, 407) is arranged electrically parallel to the discharge protection device (103, 203, 303, 403) and the detection unit (107, 207, 307, 407) comprises at least one memory block (106, 206, 306, 406), the memory block (106, 206, 306, 406) having a reset input (113, 213, 313).
