Abstract (en)
[origin: WO2018087138A1] The invention relates to a drawer for a switchgear cabinet, which drawer comprises: - a base frame for mounting in a switchgear cabinet; - a sub-frame arranged slidably in an insertion direction in the base frame, which sub-frame houses switching gear; wherein the sub-frame is positionable in at least a connected position, a test position and a disconnected position; - at least one lever hingedly arranged to the sub-frame, wherein the hinge axis is perpendicular to the insertion direction, wherein a cam is arranged on end of the lever and wherein a handle is provided on the other end of the lever, opposite of the hinge axis; - at least one cam guide slot arranged in the base frame in a plane perpendicular to the hinge axis, wherein the cam guide slot is for guiding the cam on the lever and has a first slot part extending parallel to the insertion direction and has a second slot part extending perpendicular to the insertion direction; and - locking means for locking the lever in at least the connected position, the test position and the disconnected position of the sub-frame.
