Abstract (en)

[origin: EP3539632A1] It is described a method for remotely controlling multiple vehicles, the method comprising: receiving a first code by a mobile application, wherein the first code uniquely identifies a vehicle and a first set of functions of the mobile application, wherein the first set of functions of the mobile application remotely controls a set of functions of the uniquely identified vehicle; receiving a second code by the mobile application, wherein the second code identifies a toy vehicle and a second set of functions of the mobile application, wherein the second set of functions of the mobile application remotely controls a set of functions of the toy vehicle; determining the set of functions of the toy vehicle based on the set of functions of the vehicle, wherein the set of functions of the toy vehicle comprises at least a subset of the set of functions of the vehicle; and remotely controlling the toy vehicle based on the determined set of functions of the toy vehicle.
