Abstract (en)

An assembly for making a lamp incorporated into a wall of perforated bricks or blocks, or into a panel cladding of a wall, comprising a front body (10) wherein is made a light emission cavity, a lamp housing (18) that forms a lamp seat (182) suitable to house a lamp body (8), and a rear body (20) forming a housing seat (22) suitable to receive with shape-coupling the lamp housing protruding from the rear of the front body (10). The rear body (20) is suitable to be coupled to the front body (10) so as to form a monobloc panel (30) substantially parallelepiped in shape which completely incorporates the lamp housing and which is suitable to be inserted and fixed between the bricks, blocks or panels forming the wall or a cladding of the wall.
